Converting Meters to Yards

In Meet Manager:

Go to Set-Up >Meet Set-Up>click on SC Meters (be sure to click on OK at the bottom)

Go to Set-Up>Entry/Scoring Preferences>Results Tab
Add non-conforming factor of .9144>click on Apply box>click OK at bottom

You are done. The times will only change in Meet Manager under the Reports tab.

Click on results and pick one or several events. The report will show the times have changed.

**By the way, it helps if you make note of the times before the conversion so you can see that they change.

The converted times will also show when the file is exported to Team Manager
